

Nicholas Malamud

858-254-8630 | nickfromsd@gmail.com | San Diego, CA | github.com/NicholasMalamud

EDUCATION

Bachelor of Science in Computer Science (3.9 GPA)

Aug. 2019 – May 2023

California State University, San Marcos

San Marcos, CA

EXPERIENCE

Print Specialist

Dec. 2025 – May. 2026

Staples Print and Marketing Services

San Diego, CA

- Created and managed print production jobs using a ticketing system.
- Troubleshoot printer issues such as jams and errors to minimize downtime.
- Provided IT support on mobile devices (iOS and Android) for file formatting and print setup.
- Consulted with clients, including B2B accounts, to recommend print solutions and upsell services.
- Operated the Amazon returns system, processing transactions and ensuring accurate data entry.
- Delivered customer support in a fast-paced environment while meeting quality and turnaround standards.

Software Developer

Dec. 2022 – Oct. 2025

HOVR Labs LLC

San Marcos, CA

- Developed VR chemistry labs in Unity (C#) to create an immersive, hands-on learning experience.
- Launched through NSF-funded research at CSUSM and transitioned into an independent startup.
- Used Plastic SCM for version control and Jira for task management and bug tracking.
- Documented code using Natural Docs to create a searchable web-based documentation portal.
- Created and modified 3D models in Blender to produce high-quality custom assets for the application.
- Integrated Motive motion capture software into the codebase to track physical lab tools using a webcam.
- Performed routine QA testing to ensure error-free functionality and a seamless user experience.
- Worked in an Agile Scrum environment; collaborated via Microsoft Teams and pair programmed in Visual Studio.

PROJECTS

AI Number Recognizer | *Python*

- Recognizes handwritten digits using a PyTorch based machine learning neural network.
- Preprocesses images with PIL and NumPy for grayscaling, pixelating, and centering digits.
- Optimized for GPU computation to improve speed and performance.

Fast Food Ordering Application | *Java, SQL*

- Desktop food ordering application built with Swing GUI Library and an SQL database.
- Features a resizable UI to fit every monitor size and scrollable lists to adjust to changing data.
- Packaged as a cross-platform JAR executable compatible with Windows and macOS.

Bot Security Test | *Python, Unity*

- Automated testing bot for video games, built to play a color clicking game by itself.
- Uses OpenCV library for image recognition and pyautogui library to control the mouse.
- Developed an algorithm to make natural looking mouse movement.

eBook Rental Website | *HTML, CSS, PHP, SQL*

- Website where users can rent and upload eBooks.
- Session cookies track users on the server and prepared statements prevent SQL injections.
- Facilitates ecommerce based on user-generated content.

TECHNICAL SKILLS

Languages: Java, Python, C++, C, C#, SQL, JavaScript, HTML, CSS, PHP, Unix Bash

Software: Visual Studio, Eclipse, Unity, Adobe Acrobat, Wireshark, Android Studio, Hashcat, Blender, AWS

Libraries: OpenCV, Swing, pandas, PyTorch, PIL, NumPy, matplotlib, Tkinter
