

Nicholas Malamud

858-254-8630 | nickfromsd@gmail.com | San Diego, CA | github.com/NicholasMalamud

EDUCATION

Bachelor of Science in Computer Science (3.9 GPA)

Aug. 2019 – May 2023

California State University, San Marcos

San Marcos, CA

EXPERIENCE

On-site Service Specialist

Sept. 2026 – Present

Ricoh

San Diego, CA

- Support high-volume mail and print operations as a contractor at Rady Children's Hospital.
- Prepare and process more than 2,000 envelopes and packages per day.
- Operate mail-processing, postage and printing equipment.
- Manufacture medical labels, laminated signs, and instructional books.
- Accurately billing 100 different departments for daily postage charges totaling thousands of dollars.

Print Specialist

Dec. 2025 – May. 2026

Staples Print and Marketing Services

San Diego, CA

- Produced customer print orders by tracking and completing work requests in a ticketing system.
- Troubleshoot printer hardware issues, including paper jams and print errors, to minimize downtime.
- Provided IT support for iOS and Android mobile devices, assisting with file formatting and print setup.
- Consulted with clients, including B2B accounts, to recommend print solutions and upsell services.
- Operated the Amazon returns system, processing transactions and ensuring accurate data entry.
- Delivered customer support in a fast-paced environment while meeting quality and turnaround standards.

Software Developer

Dec. 2022 – Oct. 2025

HOVR Labs LLC

San Marcos, CA

- Developed VR chemistry labs in Unity (C#) to create an immersive, hands-on learning experience.
- Launched through NSF-funded research at CSUSM and transitioned into an independent startup.
- Used Plastic SCM for version control and Jira for task management and bug tracking.
- Documented code using Natural Docs to create a searchable web-based documentation portal.
- Created and modified 3D models in Blender to produce high-quality custom assets for the application.
- Integrated Motive motion capture software into the codebase to track physical lab tools using a webcam.
- Performed routine QA testing to ensure error-free functionality and a seamless user experience.
- Worked in an Agile Scrum environment; collaborated via Microsoft Teams and pair programmed in Visual Studio.

PROJECTS

AI Number Recognizer | *Python*

- Recognizes handwritten digits using a PyTorch based machine learning neural network.
- Preprocesses images with PIL and NumPy for grayscaling, pixelating, and centering digits.
- Optimized for GPU computation to improve speed and performance.

Fast Food Ordering Application | *Java, SQL*

- Desktop food ordering application built with Swing GUI Library and an SQL database.
- Features a resizable UI to fit every monitor size and scrollable lists to adjust to changing data.
- Packaged as a cross-platform JAR executable compatible with Windows and macOS.
